## ZOOM CONTROL PANEL

- **Mute:** allows you to silence yourself. Use this if someone else is talking and the system's natural echo cancellation is not working. The up-arrow next to **Mute** can be used to select your audio input (e.g., switch from your computer's microphone to a headset).
- **Start Video:** This allows you to turn on your webcam. The up-arrow next to **Start Video** will also give you access to the virtual background feature.
- **Participants:** Allows you to see the names of the people watching. You can also use this to allow individual participants to be heard.
- **Share Screen:** Allows you to share what is displayed on your monitor with viewers. If you have dual monitors, you can select which monitor to display and which to reserve for your reference and notes.

***Your session will automatically be recorded.***

# LIVE SESSION VIEW

**Attendees will see you live on this screen. As a speaker, you are in a backend Zoom broadcasting to the platform.**
